

# EFE new tooling 2019

## Volvo Olympian/Palatine I

2019 will see the first 100% new tooling from EFE by Bachmann. The Northern Counties Palatine I bodied Volvo Olympian first entered service with London Central and London General in 1995. The once-fashionable split-level entrances fell foul of low floor access legislation in the Capital and the Olympians were cascaded to other operators outside London. Several early examples are still in service. *Our thanks go to Galloway Coach Travel and Stephenson's of Essex.*
